**STATEMENT OF RELEVANCY**

**Reference AO on Form PTO-1449:**

The reference discloses the technique of recording data units, each containing a plurality of GOPs. However, the reference describes no embodiments in which a transport packet is recorded in two or more sectors as in the present invention. Nor does it describe information that represents the start/end position of an I picture.

**Reference AP on Form PTO-1449:**

This reference discloses the technique of packetizing video/audio data in units of playback time, each having a constant Q value. The technique differs from the present invention in which the packets have the same data size of, for example, 188 bytes. The reference describes nothing about a positional relation between packets and packs larger in size than the packets.
